

# corefx

## Express Yourself!

**corefx** is a creative expression software program that includes draw, paint, animate and other artistic and document creation functions. With three skill levels to choose from, the extensive but easy to use creative tools suit the young novice computer user as well as the experienced graphics artist. The Program contains clipart and other images for creating stories and projects. **corefx** offers many cross-curricular teaching applications.

## Draw, Paint, Animate, Create and Teach!

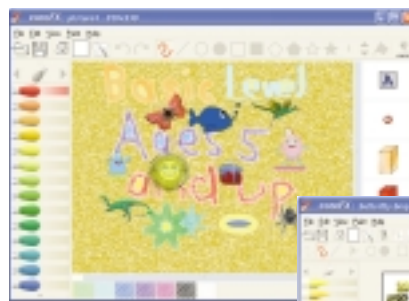

### Choose a Level and Learn!

Three pre-configured interfaces tailor the software to the needs of a young Basic user, a Junior user and a confident Advanced user.

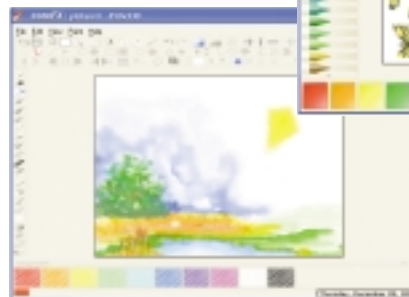

**corefx** can easily be configured to meet any user's specific needs. You can add or reduce the number of tools available to make the program as powerful or as simple to use as you wish.

The fully customizable interface constructor allows you to:

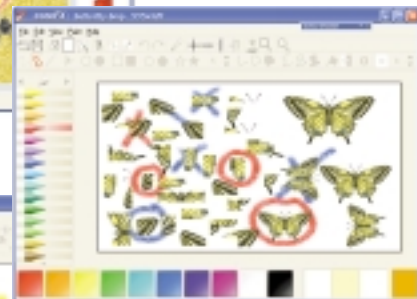

- Add or remove tools to meet any user's abilities
- Increase/decrease tool button sizes
- Add or remove any menu options
- Move tools around; lock or unlock toolbars
- Create completely new toolbars with new functions
- Save and load your own customized settings for future use

**Basic** (Age 5 and up)

**Junior** (Age 9 and up)

**Advanced** (Age 13 and up)

### System Requirements

Windows 98 and up  
96 MB RAM.  
400 MHz, CD-ROM Drive,  
125 MB hard drive disk  
space, VGA display,  
16 bit color with  
800 x 600 resolution.

# corefx Tools and Special Effects!

**Choose a Level and Learn!** corefx has three pre-configured interfaces to tailor the software to the needs of a young Basic user, a Junior user and a confident Advanced user. It's also easy to customize the toolbar!

**Progressive Undo and Redo** allow all users to undo (step by step) the whole of their painting or drawing to try again and again until they are satisfied with the results they have achieved.

**The Stamp Library** provides hundreds of curriculum relevant images. Stamps can be used as single images or sequences of images, can be resized, flipped, skewed and transformed in many different ways. Users may create and save their own artwork as stamps into their own stamp library for future use.

**The Circle, Rectangle, Star, Polygon and Spline Tools** allow a rich range of shape construction when creating images.

**The Symmetry Tools** offer two and four way symmetry, and full control over how the symmetry is applied – both when using the painting tools and also when working with stamps, effects, textures, motifs and text.

**The Pattern Editor** allows the learner to experiment with and apply a range of pattern and tiling effects, in a wide range of combinations.

**The Background Texture Chooser** lets the user apply media with a range of textured background effects, to simulate different paper types and media combinations

**The Effects Tools** allow areas of your image to be smeared, lightened, darkened sharpened, softened and outlined in a simple, intuitive fashion.

## Realistic Media Effects!

The rich range of realistic natural media effects allows all users to work intuitively with the same tools on the computer that they have already used in their real life Art and Design work:

- Crayons
- Oil Pastels
- Pencils
- Charcoal
- Felt pens
- Chalks
- Acrylic paints
- Poster paints
- Watercolor paints
- Airbrush sprays

**The Animation Toolbar** allows sequences of images to be combined to generate moving images, using a film frame metaphor. See the previous frame as a shadow when you are drawing the current frame, and a range of cartoon elements lets all users experience the creation of exciting moving images in minutes.

corefx allows you to work with images from a wide variety of sources. Use digital photographs, image scans, web graphics and many other sources as your starting point. Any images you produce with corefx can easily be saved for use on the web (including animations), used in desktop publishing, presentation or word processing software or incorporated directly into other projects.

## corefx Resources!

Get started with a self-running Program Tour that explains the tools and special effects at each program Level. corefx also contains an instructional Activity Guide for users and a detailed Reference Guide for teachers and advanced users. Printed Guides are also available.

Description	MFG SKU	MSEP
corefx Single User	COFX-5105/01	54.95
