

Math Course Series

Assess and Build Key Math Skills!

The five title Math Course Series organizes most of the core math curriculum administered from Grade 3 to Grade 8. Each self-paced Course develops fundamental math skills, reasoning powers and math confidence which provides an important foundation for higher math learning.

Each Course contains a Textbook and Workbook of Exercises and Activities, plus an instructional Help Guide for teachers and tutors. These resources are also available in printed versions.

The computer managed learning environment adjusts to individual learning needs. Courses are excellent for enrichment, consolidation or remediation. The School Version manages up to 500 Learners per station.

RECOMMENDED BY

Each software program pre-tests for knowledge and **customizes individual lesson plans**. Tests results are recorded and help teachers to monitor student progress and assess learning difficulties.

System Requirements
PC (IBM or compatible),
Windows 98/Me/2000/XP,
Pentium II or higher,
128 MB RAM,
200-450 MB hard disk space,
CD-ROM Drive,
VGA display,
16 bit color with
800X600 resolution

Course 1

Fractions STEP BY STEP

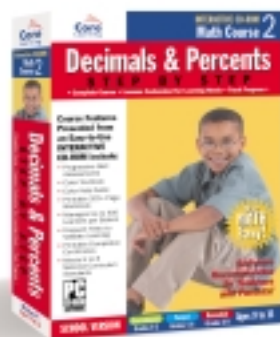

This complete Course on fractions covers 30 learning outcomes from fraction concepts to arithmetic with fractions and word problems. Lessons are customized to individual learning levels. Progress can be tracked by teachers for several classes! Includes printable Textbook and Workbook plus Help Guide for teachers.

Enrichment
Grades 4-5

Target
Grades 5-6

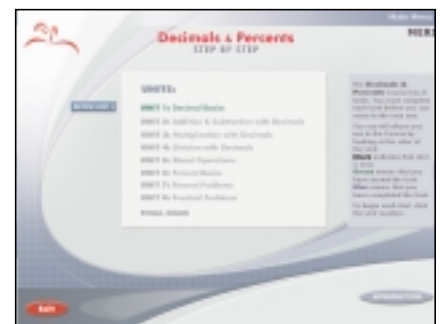

Remedial
Grades 6-9

Course 2

Decimals & Percents STEP BY STEP

This Course covers 32 learning outcomes on decimals, percents, ratios and proportions, including concepts, arithmetic and word problems. Lessons are customized to individual learning levels. Progress can be tracked by teachers for several classes! Includes printable Textbook and Workbook plus Help Guide for teachers.

Enrichment
Grades 4-5

Target
Grades 5-6

Remedial
Grades 6-9

Some of the great feedback we've received...

I have worked with at-risk youth for 18 years. I have found Core Learning's Fractions: Step by Step to be clear, to the point and concise. It is easy to understand and teach. Positive Solutions has worked with young people since 1979. We are always looking for a cutting edge curriculum, always trying to bring in the best for the students and Core Learning's Fractions Step by Step meets that need.

Pam Solitaire, Principal
San Antonio Positive Solutions
Charter School, San Antonio, TX, USA

Core Learning's Fractions Step-by-Step is a programme that is clear, concise and easy to use. The Learner is motivated by the simple review-do-reinforce design of each of the sections. The Learner can also set the pace and schedule of learning. The Helper can easily assist and support the Learner through well-prepared tips and guides. Overall, the product is designed so Learners apply what they learn rather than just accumulate knowledge.
Dr. Celia Richardson, EdD
Independent Learning Consultant,
London, England

Core Learning has developed an excellent series of products to aid parents, tutors and teachers in the navigation of the teaching of Math to elementary school children.

The Link Homeschool Newspaper

I would just like to take the opportunity to personally thank Core Learning for the 180 degree turnaround that my daughter has displayed in months.

W.A. Monroe, Newmarket, Ontario

Manages the learning process for each Learner on an individual basis according to each Learner's learning needs.

Course 3

Geometric Shapes STEP BY STEP

This Course covers 36 learning outcomes from properties of common shapes to geometric theorems, constructions and transformations. Lessons are customized to individual learning levels. Progress can be tracked by teachers for several classes! Includes printable Textbook and Workbook plus Help Guide for teachers.

Enrichment

Grades 4-6

Target

Grades 6-7

Remedial

Grades 7-10

Course 4

Basic Measurement STEP BY STEP

This practical Course is organized in 8 Units covering 35 learning outcomes for the subject of measurement. Course content includes: units and systems of measurement; length, area and volume measurement in customary and metric measurement systems; time and temperature measurement.

Enrichment

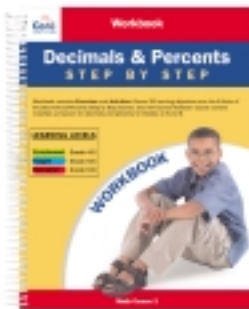

Grades 3-4

Target

Grades 4-5

Remedial

Grades 5-7

Course 5*

Data Management STEP BY STEP

This Course is expected to be organized in 8 Units covering 34 learning outcomes for the subject of data management. Course content includes data graphs and plots, mean, median and mode, data presentation, statistical analysis and data oriented word problems.
